ABOUT

Over the past year, I've built 15+ projects, including landing pages, SPAs, web apps, Canvas animations, and audio/video processing. I've worked with third-party APIs, refactored and migrated projects to TypeScript, and applied both OOP and functional programming. I've also solved 130+ Codewars challenges, sharpening my problem-solving skills in algorithms and data structures.

SKILLS

JAVASCRIPT | TYPESCRIPT | HTML | CSS | SASS | REACT.JS | VITE | WEBPACK | GIT | NODE.JS

EXPERIENCE

THE ROLLING SCOPES SCHOOL / FRONTEND DEVELOPER

JUNE 2024-PRESENT

Thanks to Rolling Scopes School, I gained hands-on experience working on real projects, studying specifications and documentation, and receiving valuable feedback from senior mentors and the community. Participating in code reviews and cross-checks helped me improve code quality and understand different approaches to problem-solving, taught me to analyze and write clean, maintainable code while effectively collaborating with others. I also received high scores from my mentor for project quality and technical knowledge.

LIST OF MY PROJECTS

EDUCATION

RS SCHOOL - JAVASCRIPT / FRONT-END COURSE

JUNE 2024-OCTOBER 2024 (REMOTE)

Build real projects, including a multi-page website, a landing page, a music player, an image gallery with API integration, a Tic-Tac-Toe game and CSS-slider. Gain experience with JavaScript, DOM manipulation and responsive design.

UDEMY - COMPLETE JAVASCRIPT & REACT COURSE. FROM ZERO TO PRO

FEBRUARY 2024-MARCH 2025 (REMOTE)

Master JavaScript, React, and essential web development concepts from scratch. Learn ES6+, DOM manipulation, asynchronous programming, React hooks, state management, and more to build dynamic, modern web applications.

MEDICAL TECHNOLOGY/MEDICAL INFORMATICS (VOCATIONAL) – COSINUS

SEPTEMBER 2022 - JUNE 2024 (WARSAW, POLAND)

Gained practical experience in installing, configuring, and maintaining IT systems and medical electronics (HealthTech).

ECONOMICS (BACHELOR'S DEGREE) – BELARUSIAN STATE ECONOMIC UNIVERSITY

SEPTEMBER 2003 - JUNE 2008 (MINSK, BELARUS)

COVER LETTER

Dear Hiring Team,

My IT journey started with Java, but I quickly realized how much I care about visuals and moved to frontend. I love making things both responsive and good-looking, without sacrificing functionality.

I've always been curious about how things operate under the hood. In my recent projects (15+ over the past year), I focused on writing scalable, modular code. I built a small custom library in vanilla TypeScript, including a router for SPA and a Redux-like state management system.

I've worked with both OOP and functional programming, as well as animations, audio, video, canvas, and third-party APIs. Structure and architecture are essential to me, and I always strive to keep my code clean and maintainable.

For me, programming is more than just writing code – it's about collaboration. I want to learn from senior developers, share knowledge, and solve challenges as a team. I'd love the opportunity to bring this mindset to your company and contribute to your projects.

You can find links to my projects and code here: [Git Hub](#).

Looking forward to discuss how my skills will contribute to your team.

Best regards,
Anna Vasilevich

RODO

I consent to the processing of my personal data for the purposes necessary for the recruitment process in accordance with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of individuals with regard to the processing of personal data and on the free movement of such data and repealing Directive 95/46/EC (RODO).
